

## TR4-X Pit Lid Mount

The NextCentury Outdoor Transceiver (TR4-X) can be secured below a meter pit lid using the Pit Lid Mount. It is recommended to use the TR4-X with plastic or composite-plastic pit lids. Use of TR4-X under a cast-iron or metal lid will greatly reduce wireless range and is **not** recommended.

### 1) Remove Lid Cutout

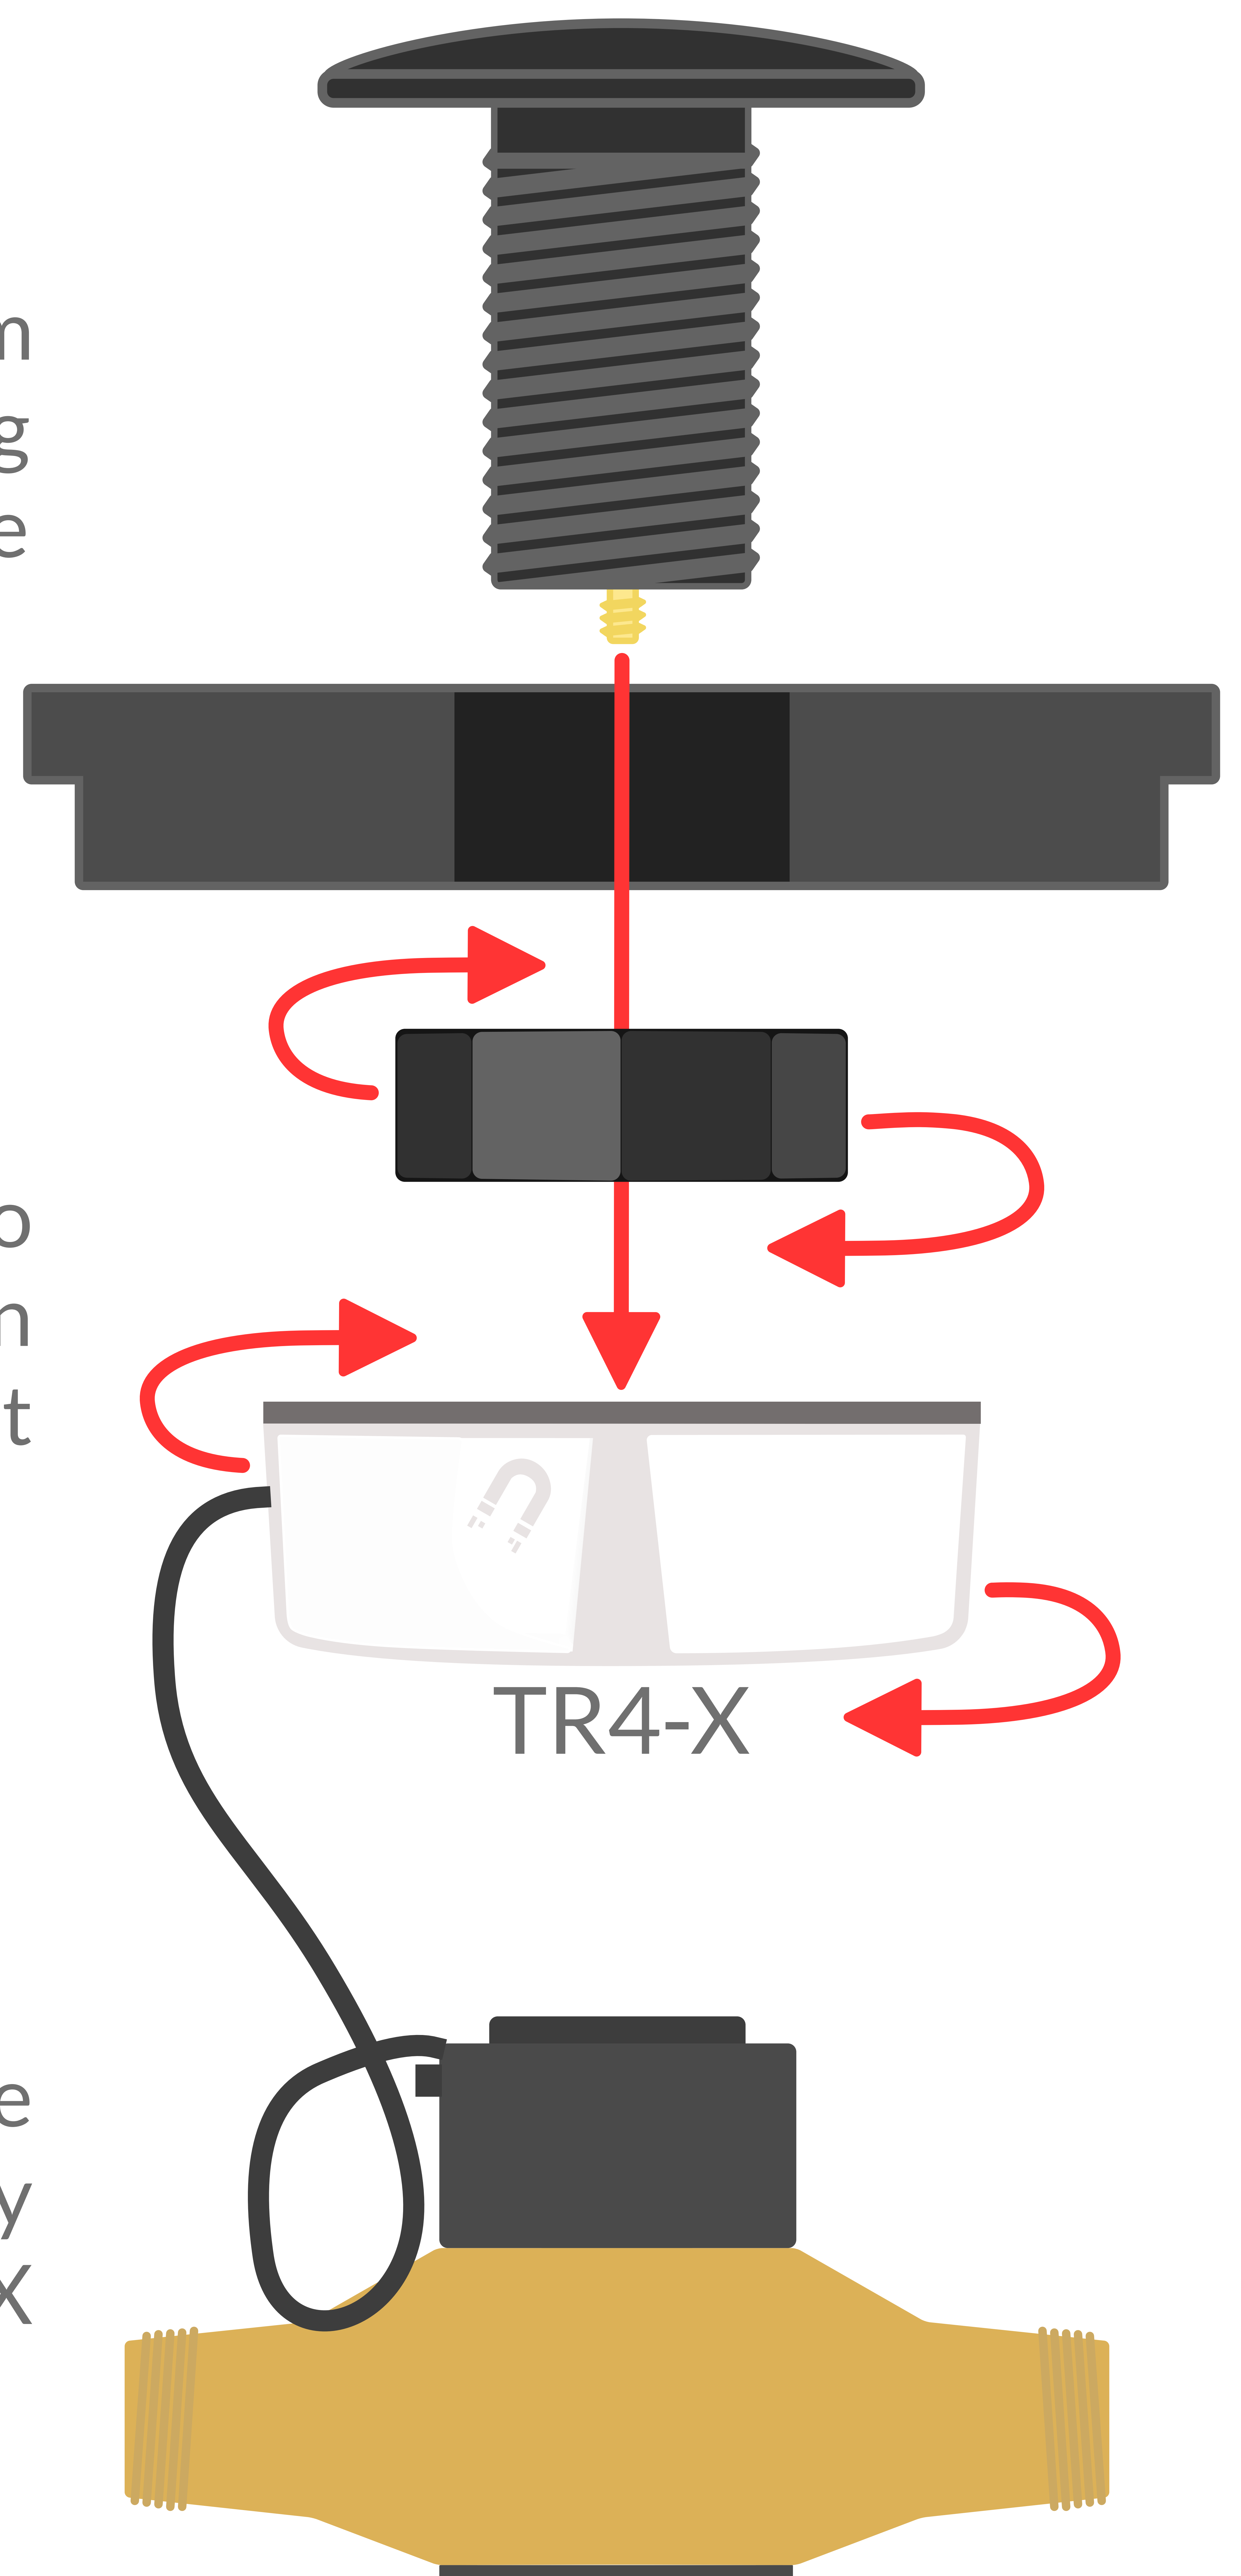

Remove the round mounting cutout from the meter pit lid, exposing the lid's mounting hole. The TR4-X Pit Lid Mount is compatible with hole sizes from 43mm to 54mm.

### 2) Attach the TR4-X

Insert the Pit Lid Mount and secure it to the lid using the provided mount nut. Then secure the TR4-X to the Pit Lid Mount utilizing the built-in threaded fastener.

### 3) Connect Cables

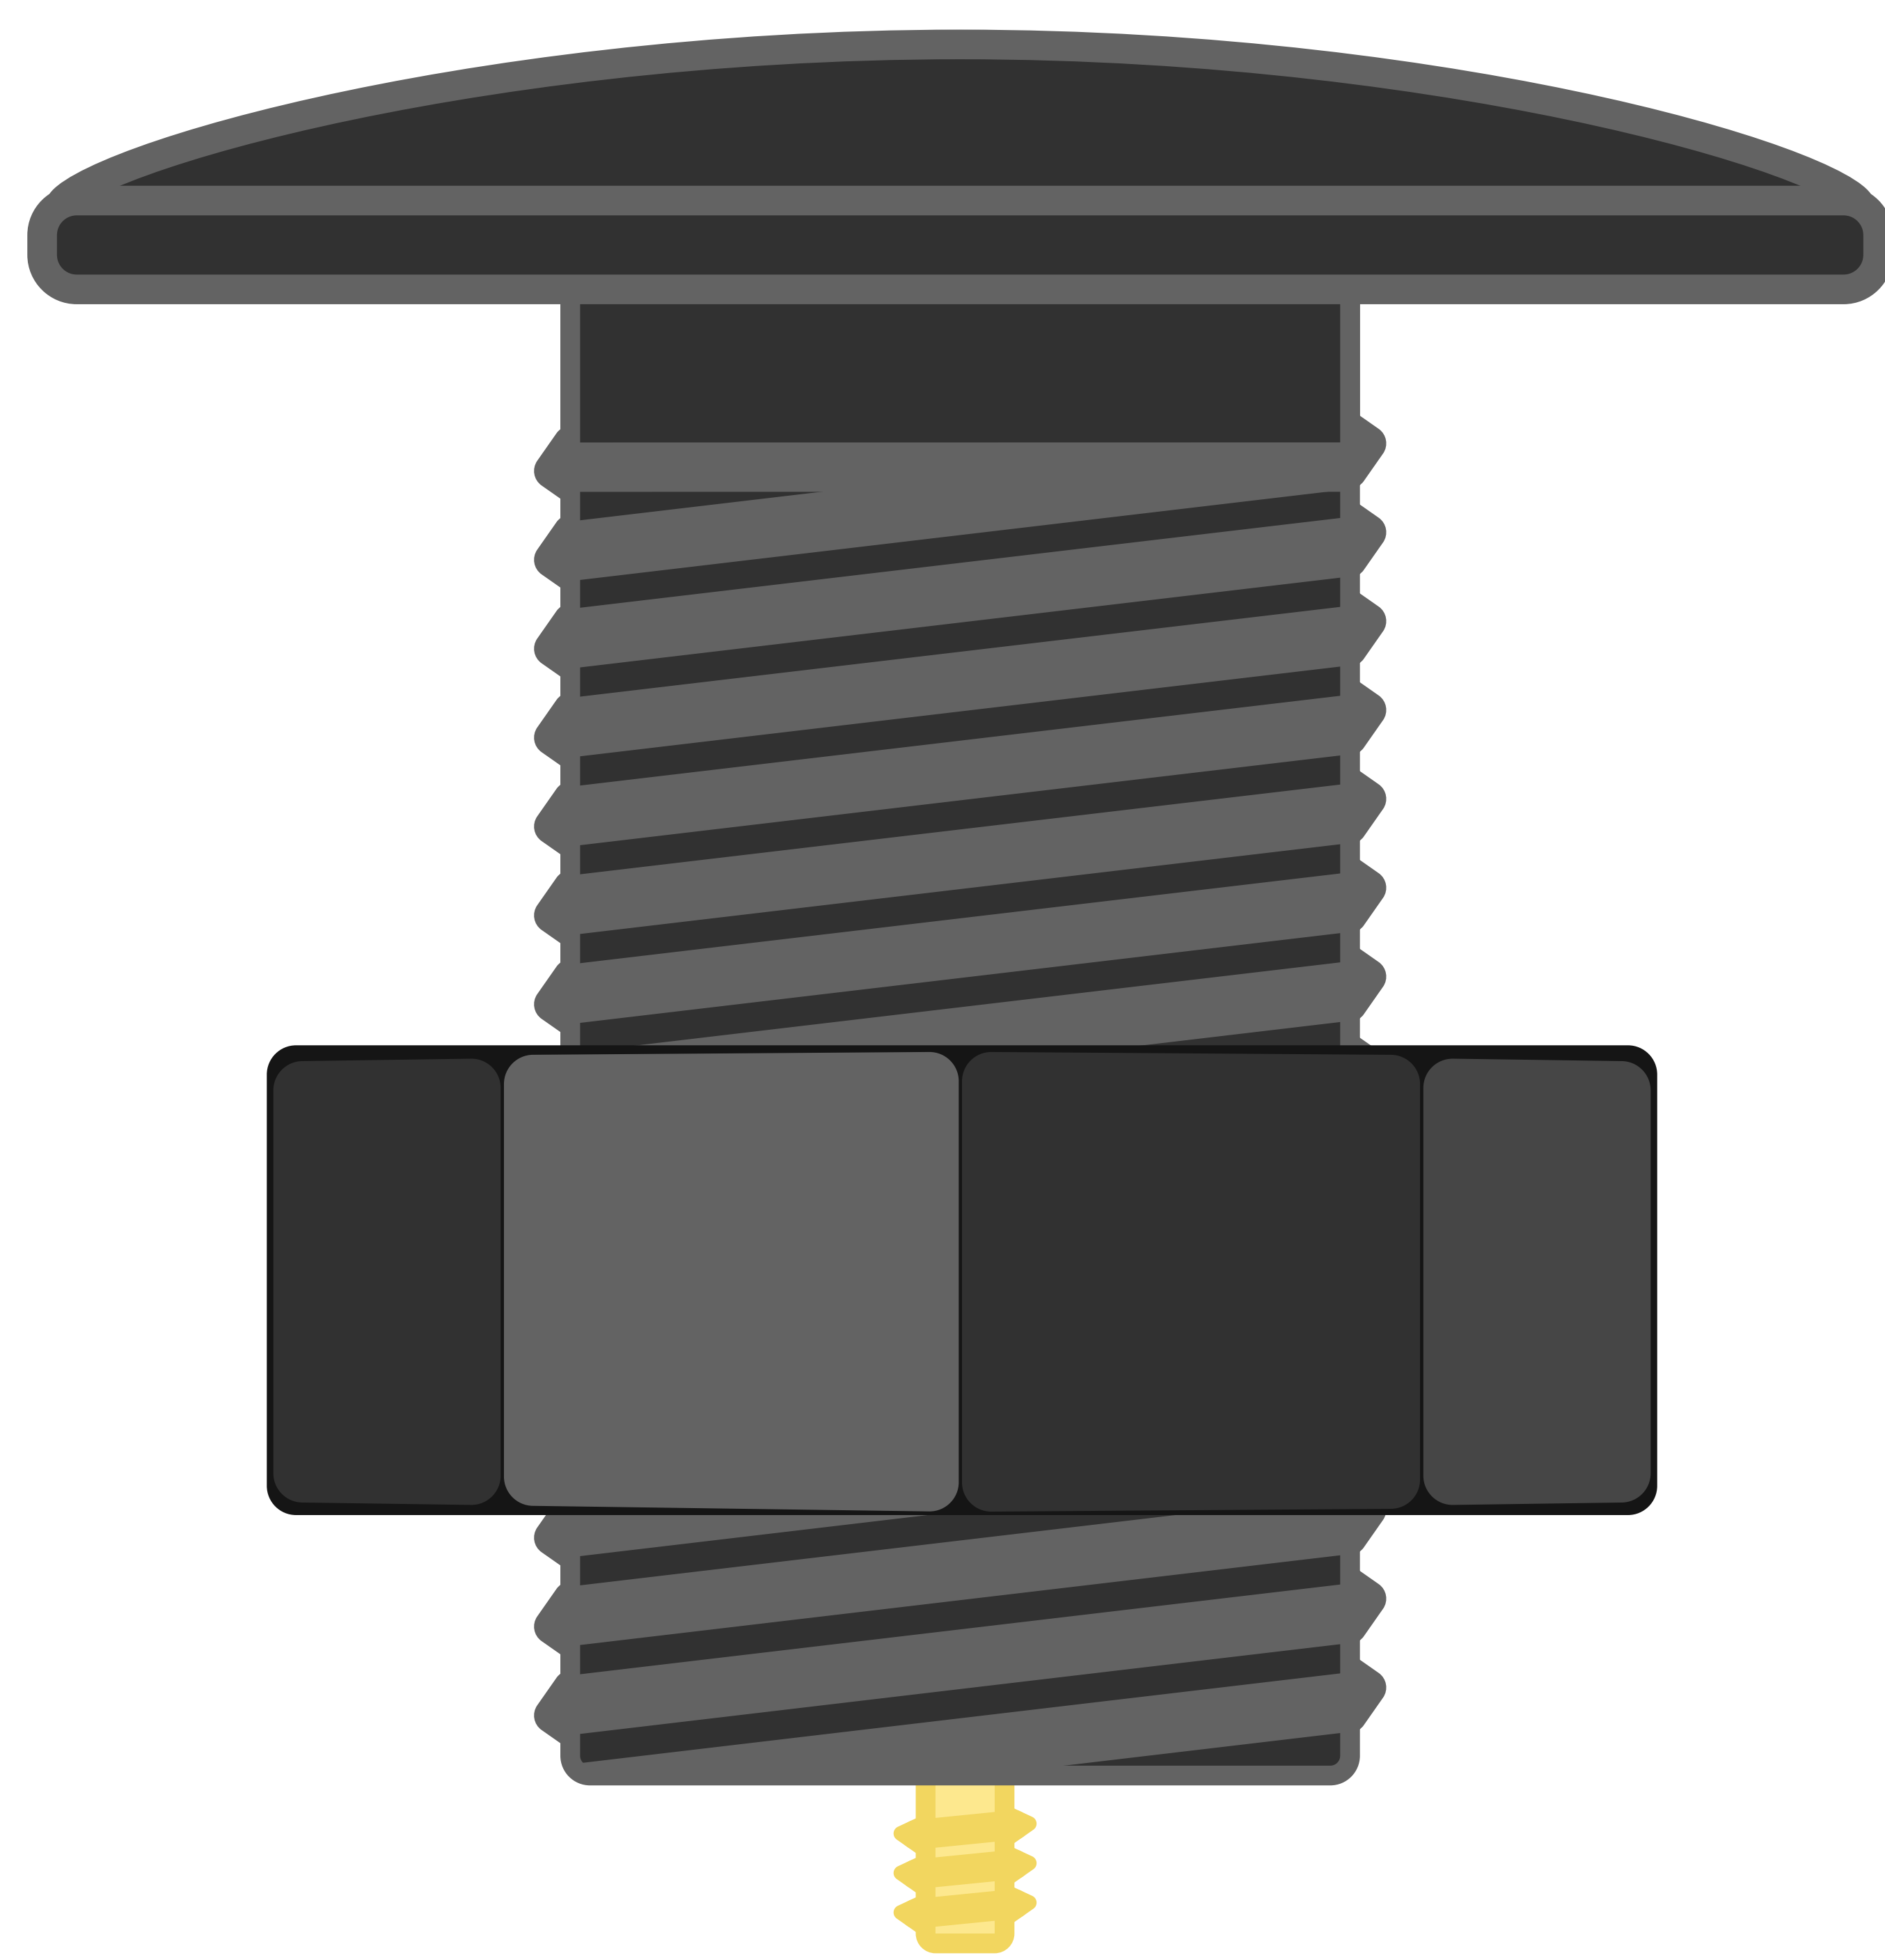

Splice the wiring of the TR4-X and the water meter using the NextCentury waterproof Field Splice Kit. See TR4-X wiring guide for proper wire connections.
